

CANZAC® Dowel Alignment

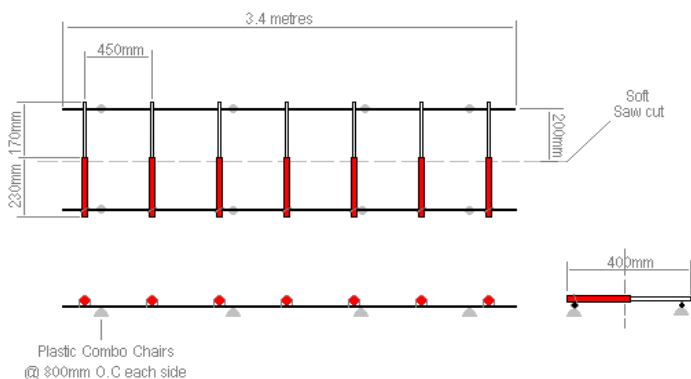

For use in saw cuts and continuous pour control joints

Dowel Alignment Product information

- Quick & easy to install, cost effective system.
- Supported on plastic ground chairs.
- Option of square, round or plate dowels.
- Galvanized or steel for any situation.
- A range of dowel diameters and spacings for different load and slab thicknesses.

The CANZAC dowel alignment system is made up of 2x HD10 runner bars and the Canzac speed dowel system, with exposed dowel ends welded to one side, and the sleeve side tie wired to the other at your exact centres required.
