IN SLAB

TALL SLAB ON GROUND CHAIRS

Tall Slab On Ground Chairs (TSOG) chairs are an economical, easy-to-use alternative to metal chairs with bases in deep slab situations.

They are lightweight and leave no voids under the bar mesh, and have no rust problems.

The easy clip-on system ensures the chair stays in place while the integral base saves time and labour placing separate bases. The chairs have been load tested to exceed 200kg, and are available in 110, 120, 130, 140 and 150mm cover.

KEY FEATURES / BENEFITS

- Commercial and civil projects, such as deep slab on ground and roadways.

SIZES AND DIMENSIONS

CODE	DESCRIPTION	BAG QTY	PALLET QTY
94 080	110mm Single Height Chair with Base Clip	100	3200
